Program	Description
<p>Play & Learn Drop In</p>	<p>This program follows YMCA Playing to Learn curriculum where enjoyable and spontaneous play occurs in supportive, caring environments. Children direct their own learning and have input in what they would like to learn. Children will have the opportunity to interact with a variety of materials and will get to choose their play experiences. Playing to learn allows children to develop the foundations for language and literacy, mathematics, science and the arts.</p>
<p>Cook, Eat & Mingle <i>(Must register by noon the day before the program)</i></p>	<p>This 2-hour class will give both parents and their children the opportunity to get messy in the kitchen. Participants will be able to learn new skills in the kitchen and bond through sitting down and eating the food that they made together.</p>
<p>Sensory & Messy Play</p>	<p>In this class, children will explore their senses by participating in a variety of activities to enhance their learning. Sensory play stimulates the child's senses through hands on activities that allow them to explore and discover the world that they live in. Children will participate and experience a variety of sensory activities in this class.</p>
<p>Story Time</p>	<p>Come join us as we read books, sing songs and learn finger plays!</p>
<p>Outdoor Play</p>	<p>Program will be held outdoors in our playground. Children and adults will have the opportunity to develop a range of body control, locomotor and sending and receiving object skills in this active outdoor class.</p>
<p>Family Game Night</p>	<p>Come play some fun interactive games with us!</p>
<p>Adventures in Science!</p>	<p>This program will introduce children to a wide variety of STEM skills by stimulating their natural curiosity and allowing them to problem solve by providing them the opportunity to complete hands on activities. The class will include activities such as loose parts play and building structures with Lego.</p>

Garden Time	Families will have the opportunity to tend to our garden boxes in our play space. We will learn how to care for plants, weed the garden and harvest what is grown in it.
Toddler Gym Time and Family Gym Night	Research suggests that an early start in physical literacy enhances development of brain function, physical coordination, gross motor skills, posture and balance. Children and adults will have the opportunity to develop a range of body control, locomotor and sending and receiving object skills in this active class.
EarlyON Swim	Join us at the Archie Dillon Sportsplex for a family swim to promote family engagement.
Touch a Truck	This fun, hands on event allows you to touch and explore all of your favourite vehicles such as a dump truck, backhoe, firetruck and more! Activities such as crafts and story time focusing around the trucks will also be held and refreshments will be served. This program is being held in front of the Timmins Public Library on Second Avenue.
FASD Awareness Walk @ Gillies Lake	We will be at Gillies Lake Conservation Area for Fetal Alcohol Spectrum Awareness Day. We will walk to promote awareness of the effects of prenatal exposure to alcohol, to increase compassion for individuals affected and to minimize further effects and to ensure healthier communities in the future. Wear red to promote the visibility of individuals living with FASD.
Kindermusik	The KINDERMUSIK program is designed for parents and their young children to bond through music. Each class is planned to not only introduce your child to music, but to also aid in their social, mental and physical development. Join us at Natisha McLeod from Beautiful Noise Music School delivers the class.
Zumbini	Created by Zumba® and BabyFirst for kids ages 0-4, the Zumbini® program combines music, dance and educational tools for 45 minutes of can't-stop, won't-stop bonding, learning, and fun! Join us as Katie Last from Kate's Zumbaholics teaches us how to Zumbini.
